

# Secretary to Secretary: The Path from Data to Decisions

From a keystroke at a school to a stakeholder's decision, a network of software applications supports data driven decision making (D3M). Linking software applications for data sharing is the role of technology standards such as SIF (Schools Interoperability Framework). System interoperability, as illustrated here, reduces the burden on school staff, strengthens data quality, and improves timeliness of data collection/reporting efforts.

★ Agent enables connectivity.
