

# State Report Manager: The Fast Track to Efficient State Reporting

State Report Manager (SRM) empowers State Education Agencies (SEA) by giving their districts a fully automated reporting tool to coordinate state data submissions. SRM manages the entire process of consolidating, cleaning, formatting, certifying, and exchanging data between organizations. This ensures that the SEA receives a “perfect” file every time.

ESP Solutions Group

Districts are currently using informal systems and time consuming practices causing errors and prolonging an already difficult process.

## When is State Report Manager Crucial?

**High Stakes:** There are consequences related to accuracy, for example: funding, accountability, and public reporting.  
**High Complexity:** Data rules are complex and change periodically.  
**High Demand:** Data must be exchanged securely and on time.

## State Report Manager Benefits

- State-of-the-art student record collection system that saves time, money, and resources for the SEA and its school districts.
- Sender of the data (district) is in full control of its data until submission.
- Pain is outsourced because the school districts do not have to:
  - Know the required reporting formats
  - Know the latest business rules
  - Know the connection protocol
  - Archive historical reports
- Only district users see errors and trial runs.
- District sees its future state statistics and public reports before submitting data.
- Time is saved at the most crucial point—at the deadline for reporting because the SEA gets a “perfect” file.
- On-demand reports can be run anytime to begin the process of analysis and response.

SRM file exchanges supported (any file exchange that imposes data rules): District to federal reporting: EDEN, District to SEA reporting: SEA core data reporting • State assessment precoding • National School Lunch Program reporting, SEA to district reporting: Distribution of state assessment results • Distribution of value-added data files • Longitudinal assessment records for mobile students • Dropout recovery records for transfer students, Intradistrict file exchanges: Research and evaluation analysis file consolidation from multiple sources
